

- Day of the Dozer Release Form 2021 -

Please read the following before signing your ticket!

The Foundation is following the Executive Order as well as guidance provided by the state regarding the Bridge Phase; therefore, the following changes in the Foundation's coronavirus approach are effective immediately:

Fully Vaccinated Individuals: Face coverings and physical distancing are not required indoors or outdoors for fully vaccinated individuals. Exceptions to this guidance include healthcare settings and public transportation.

An individual is considered fully vaccinated 14 days after the second dose of the Pfizer or Moderna vaccine and 14 days after the single dose Johnson & Johnson vaccine.

NOT Fully Vaccinated Individuals: Individuals who are not fully vaccinated are required to wear a face covering when unable to maintain the six-foot physical distancing requirement both indoors and outdoors. Consistent with the State's approach, enforcement of vaccine compliance is a personal responsibility.

It is imperative that all members of the Great Plains LIFE Foundation remain committed to the health and safety of our community by continuing to follow all public health guidance and be supportive of individual choices pertaining to one's health. It is each individual's responsibility to follow all public health guidance.
